License options

$2,500 /mo 1 month min	Commercial use	While this package is active, you are allowed to both use and distribute MistServer for commercial purposes. There is no use limit, no instance limit, no other hidden per-server fees of any kind. *This package may be used either for the open source edition or the Pro edition, at no additional charge.*
$2,500 /mo 1 month min	Offline use (additional)	Normally MistServer requires an active internet connection to remain functional. While this package is active, you can both use and distribute MistServer without an active internet connection required.

Services

$1,000 /mo 12 month min	48h patch service	MistServer is extremely robust and rarely has issues. We are so confident of this, that we are willing to guarantee it. For mission-critical use, we offer this package. While active, it guarantees a fix or workaround for any suddenly encountered bugs or issues within 48 hours after notifying us.
$750 - $500 /mo 3 month min	Tested appliance	For our customers that build appliances (either physical or virtual) that rely on MistServer, we offer this package. While active, you send us your appliance(s) and we test each new MistServer release against your appliance(s) for compatibility problems and other regressions. MistServer generally has a 3 month release interval, hence the 3 month minimum duration. *Your first appliance is $750 USD per month, each additional appliance is $500 per month.*
$500 /mo 1 month min	Remote monitoring	While this package is active, you will receive access to a web panel showing you server vital statistics over time. Additionally, we will actively monitor your server for problems and assist in resolving them if they occur.

Projects

$200 /hr	Custom development	Want custom features? Want us to integrate something with MistServer for you? Other MistServer-related programming needs? Of course you can extend MistServer yourself, but with this package you can get the team that knows MistServer best to do custom development for you. This is always done on a per-project basis, at a fixed paid-in-advance price with a fixed deadline. Contact us for details.
$1,250 /day per person + expenses	Event support	Organising a one-off event? Have a big release coming up? Migrating your entire platform? With this package you can hire the assistance of our engineers on a per-day basis (either on-site or remote), to ensure everything will go smoothly. In the event that anything goes wrong, they will do required patches for you on the spot at no extra cost. Contact us for details.
